

WE'RE HERE TO HELP

Working with knowledgeable and experienced teams can bring enormous value to a development project. Not only do we offer a variety of water and wastewater services for developers across the state, we offer teams of experienced professionals who can help you complete projects of any size.

If you are a developer, business owner or other entity that would like to extend water infrastructure to a new project either within or near an existing Pennsylvania American Water service area, the first step is contacting the appropriate Developer Services representative listed on the right.
